Education

Stanford University **Stanford, CA**
B.S. Symbolic Systems *Sep 2026 – Jul 2030*
- Interests: artificial intelligence, neuroscience, computational biology, philosophy of mind, and alignment.

St Paul's Girls' School **London, UK**
A-Levels: Mathematics, Further Mathematics, Politics, Philosophy *2019 – 2026*
- Predicted 4A*; SAT 1540; 12 GCSEs (ten grade 9s, two grade 8s). Ethel Strudwick Prize in Philosophy.

Research & Experience

Allen Discovery Center, Tufts University **Boston, MA**
Computational Neuroscience Researcher, Dr Michael Levin *Jan 2025 – Present*
- Built and evaluated Markov models of neuronal firing dynamics; cleaned anomalous spike-train data and analysed inter-spike intervals to study pattern formation and information flow in neural clusters.
- Co-authored *Ingressing Patterns of Life* with Dr Levin on substrate-independent intelligence, morphogenesis, bioelectricity, and the boundaries of cognition; published in *Orbital Studies*.

Shiba AI **Japan / Remote**
Researcher, Multi-Agent Alignment & Safety *2026 – Present*
- Investigate multi-agent alignment and Constitutional AI, focusing on coordination, conflicting objectives, and failure modes in increasingly agentic systems.
- Explore how alignment research can translate into practical controls for systems operating with greater autonomy and interacting agents.

EnduX Limited **London, UK**
Robotics Intern *May 2025*
- Delivered live humanoid-robotics demonstrations at the London Humanoid Robotics Summit; mapped supply-chain processes across Shenzhen, Guangzhou, the US, and the UK and supported client-facing technical communication.

Centre for Digital Assets and Democracy **London, UK**
Research Fellow *Sep 2023 – Present*
- Sole junior fellow under 25; commissioned to write white papers on decentralised finance, digital assets, and liberty.

Leadership & Honours

- **Team England Debating** (2023–2025): Selected among 11 top U-18 debaters nationally; youngest winner of both the Oxford and Cambridge debating competitions at 16; Best ESL Speaker at Oxford.
- **Young Leader, Queen Elizabeth II Commonwealth Trust** (2025–Present): Sole U-18 Young Leader selected from approximately 850 fellows worldwide.
- **British Physics Computational Olympiad** (2024): Gold for a library of physics simulations modelling projectile motion.
- **John Locke Program** (2024): High Distinction, one of 5 of 200+ students, on a programme centred on wealth and inequality.

Skills & Languages

Technical: Python, machine learning, computational modelling, data analysis **Languages:** English, Russian, French
